

GREEN MAN

CREATING A GREEN MAN MASK; CONSIDERING THE PROPORTIONS OF THE FACE AND SYMMETRY.

Green Man Masks: The Making Process

Lesson 1

Lesson Objectives/ Amcanion Dysgu

- Identify the necessary steps for completing a Green Man mask.

- Continue to use symmetry when designing.

- Remember the proportions of the face.

THROUGH

- Look at an almost finished Green Man mask and break down the making process into steps. Consider materials that will be used at each step and what needs to be completed before moving on.

- Complete the symmetrical Green Man design which can be used to decorate your mask. Start to apply symmetry to your mask designs.

- Use prior knowledge of proportions of the face to design which will fit it.

1) Create a Design.

Using the sources, draw a Green Man inspired design straight onto the tracing paper. *Make sure it is unique and you have considered symmetry.*

2) Trace the design.

Trace your design 4 times onto an A4 page to create a symmetrical tile.

3) The Mask.

Think about how you will use this design in the future to decorate a mask.

Step 1

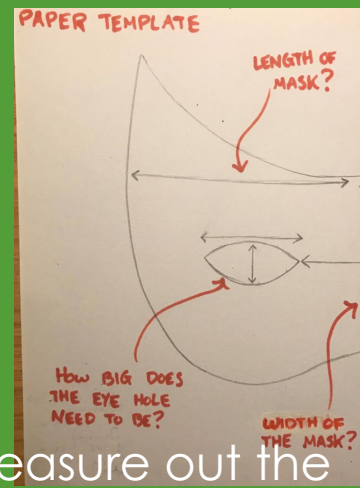

Draw half of a mask to fit the face.

Step 2

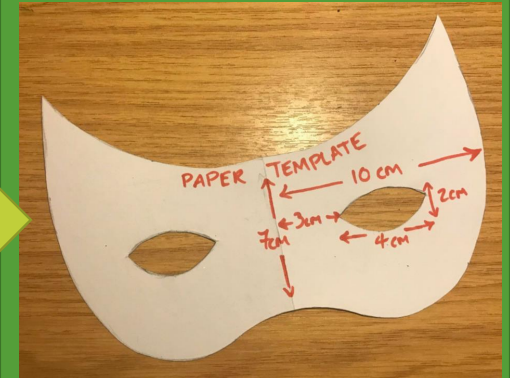

Design your final mask and annotate.

Step 3

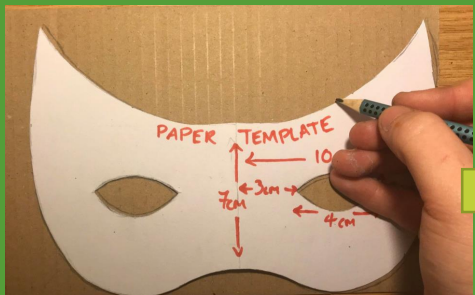

Measure out the base of your mask.

Step 4

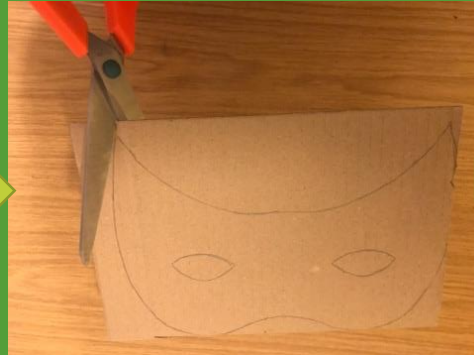

Paper template should be to size.

Step 5

Draw out round your template onto cardboard.

Step 6

Cut out your cardboard base.

Step 7

Paint a layer of white. (Optional for vibrant colours.)

Step 8

Paint your base.

Step 9

Step 10

Step 11

Step 12

Step 1

Draw half of a mask to fit the face.

- Use your portraits to draw out *half a mask design* onto tracing paper.
- *Think* about the *shape* you wish your mask to be and how much of the face it will cover:

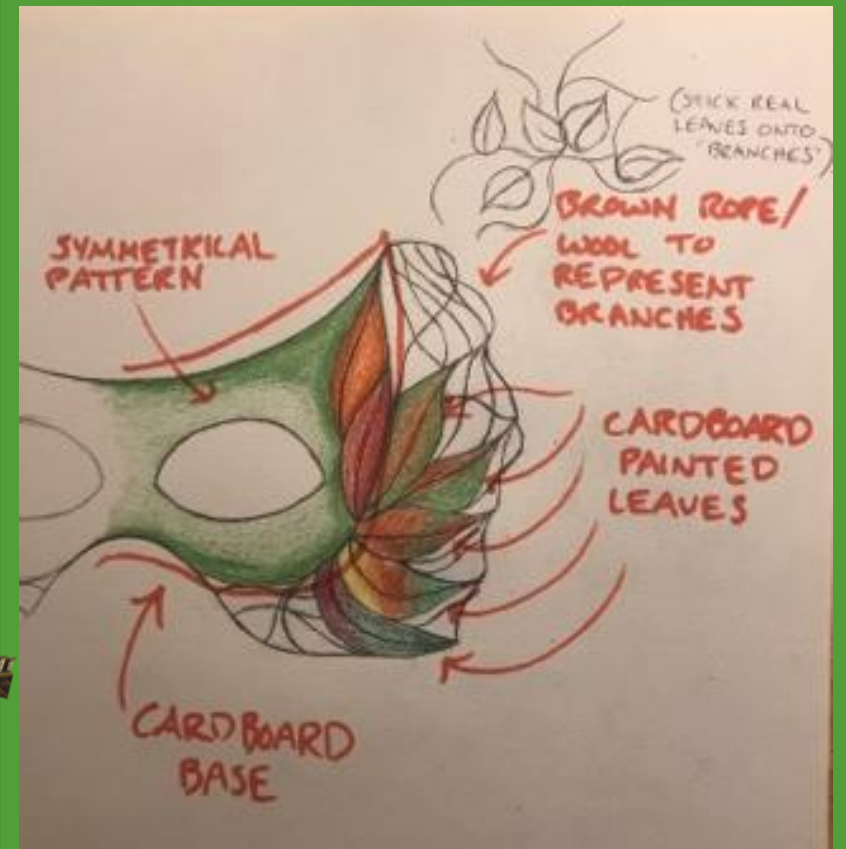

Draw out your *final* Green Man mask design.
Label the different elements of your mask.

Think about:

- *Colour* (what colour are the leaves right now?)
- *Materials* (cardboard base, will you use real leaves?)
- *Layers* (will you build up layers of leaves?)
- *Decoration* (will you add other natural elements? i.e. insects and flowers)

Step 2

Design your final mask and annotate.

Green Man Masks: The Making Process

Lesson 2

Lesson Objectives/ Amcanion Dysgu

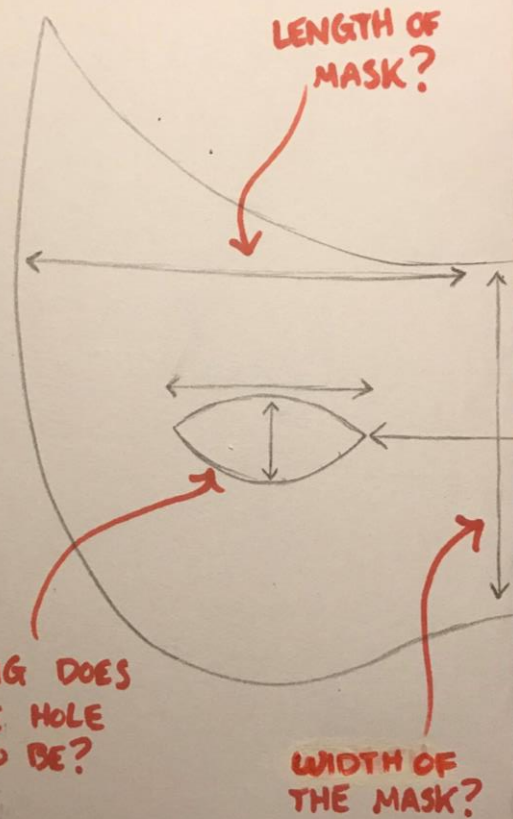

- Remember the necessary steps for completing a Green Man mask.
- Continue to use numerical reasoning when designing.
- Identify the next stage of the making process.

THROUGH

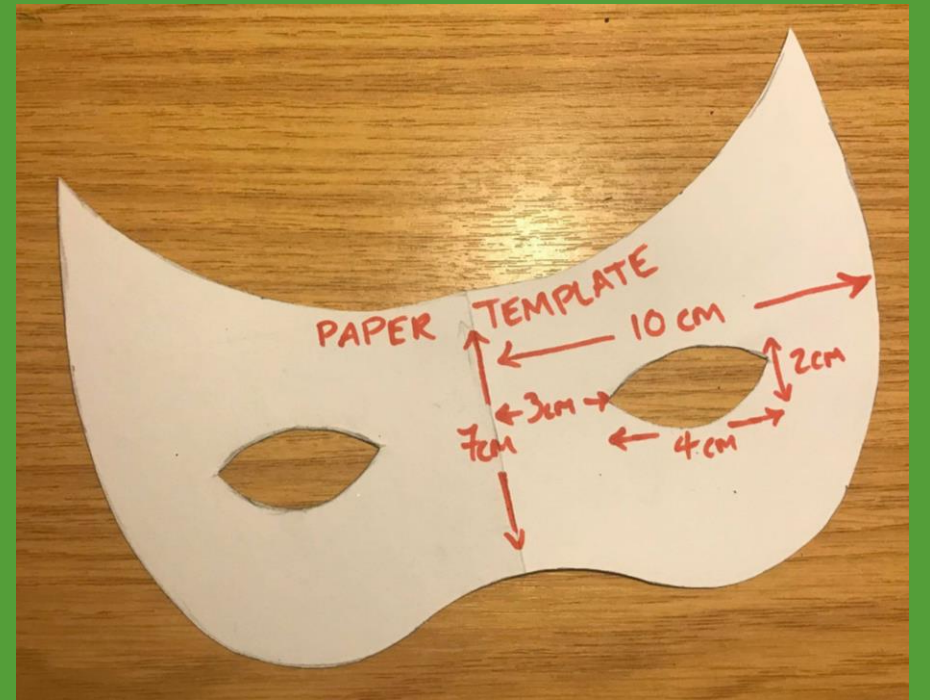

- Look at your Green Man mask checklist and identify your independent focus for this lesson. Identify what needs to be completed in order to move on.
 - Create a symmetrical paper template. Use measurements that show a consideration to the proportions of the face.
- Give yourself a target for the next lesson.

Step 3

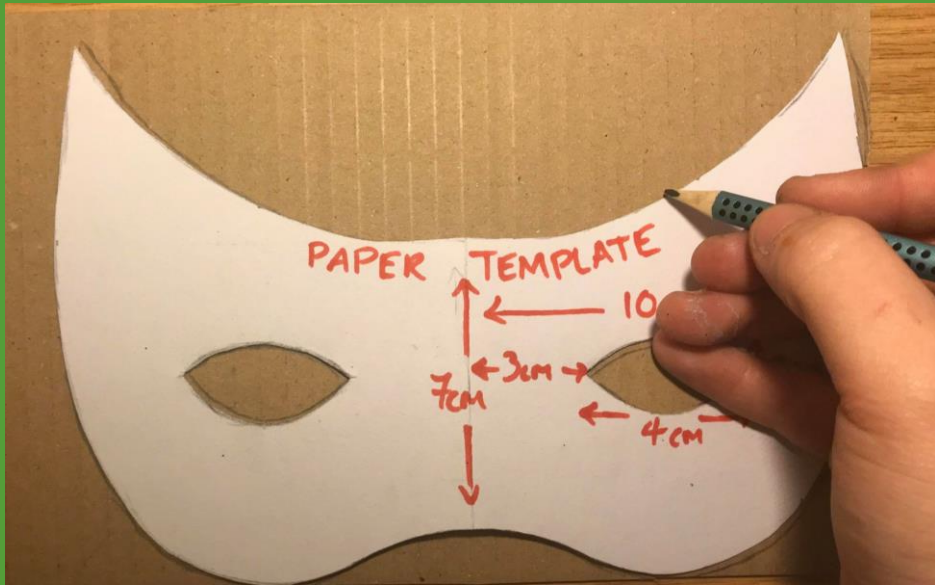

PAPER TEMPLATE

Step 4

Step 5

Step 6

Step 7

Step 8
